

DESIGN IN 360 DEGREES

IDEA

Draw a sketch of a 360 degree image

NEEDS

- Print a grid from <http://www.panoform.com/#grids>
- Or use a plain paper
- If you want to do a collaborative design, print it big
- A smartphone for taking photos and upload them
- Not needed, but nicer: Is a smartphone available to watch photos in 360 degrees? (for testing open Youtube and look for “360 degrees” – does the video work?)

HOW-TO

- Draw and colour your setting, e.g. a playground
- You can also do a collage with pictures of magazine, sticked on the grid
- Make a photo of the grid with your smartphone
- Upload your photo here: <http://www.panoform.com/tool/>
- Watch your photo with your smartphone (if it is compatible to 360 degree, you can as well use or computer and scroll)

See <http://panoform.com>

Thanks!

Steven Marx showed us this within the Praxisblog Medienpädagogik!
