

# Plain Prototyping

The important thing about plain prototyping? This approach lets you concentrate on the basics of your idea: the shape, the purpose and the technical features. You should not get lost in the decoration! That means, you are only allowed to use colourless materials.

## What you need:

- All sort of scrap material (important that these are white and/or colourless with no text on it!)
  - e.g. paper, rope, straws, cardboard, used yoghurt cups, toilet rolls, ..
  - in the best case, you use garbage and/or things you find in your home or school!
- Tape, scissor, glue or glue guns (if available)

No (coloured) pens allowed!  
Just focus on your imagination.

For this type of prototyping, we have adapted the exercise „the magic machine“, featured in WAAG's teacher maker camp cookbook (available here: [https://waag.org/sites/waag/files/media/publicaties/teacher-maker-camp-cookbook\\_0.pdf](https://waag.org/sites/waag/files/media/publicaties/teacher-maker-camp-cookbook_0.pdf))
